SAFETY

HEALTH AND SAFETY IN THE WORKPLACE AMONG

Supportiamo i nostri clienti in tutte le **attività necessarie** a **garantire** la conformità legislativa in materia di **sicurezza** e **salute** nei luoghi di lavoro.

OUR SERVICES:

- Fulfillments related to Legislative Decree 81/08
- Risk Assessment Document (DVR) pursuant to Legislative Decree 81/08
- External RSPP assignment and support to internal RSPP + A.S.P.P.
- Drafting of the PSC, POS and PIMUS, safety on construction sites, CSP and CSE assignment
- Adaptation to safety standards of existing machines according to the provisions of the Machinery Directive (Legislative Decree 17/2010) and relative CE marking
- PED Directive relative to pressured equipment
- Compulsory training on health and safety on the workplace by Legislative Decree 81/08
- Risk management for particular categories of workers and sensitive subjects
- Safety management in procurement contracts and preparation of the DUVRI for risks from interference
- Identification of PPE and training for workers on correct use
- Drafting of emergency plans, organization and simulation of emergency and evacuation tests (P.E.E)
- Assessment of risk from biological agents, noise, vibrations to the hand-arm system and to the whole body, chemical agents, manual handling of loads, manual handling of hospitalized patients, repetitive upper body movements, carcinogens and mutagens, use of video terminals, electromagnetic fields and artificial optical radiation; electrical risk and lightning protection; ATEX
- Assistance in the management of practices for obtaining FPI (Fire prevention certificates)

DUE DILIGENCE

DUE DILIGENCE

The **Due Diligence** technology is a specialized independent valuation service, rendered by a third party with the aim of highlighting any risks associated with real estate transactions. It allows buyers / investors to estimate and plan future costs for the management, maintenance, and repair of both an asset and a project. It provides elements of analysis and evaluation necessary for the exact definition of the feasibility conditions of an investment of m / l period for the acquisition and / or transformation of real estate complexes.

THE STQ TEAM:

- Defines the analysis criteria for the execution of the DD
- It carries out the DD activity through inspection, site inspections, and instrumental surveys as well as document review activities
- Establishes the priority scale of the interventions that emerged. Added values of our structure: Multidisciplinarity and harmonization of skills with a single operational interface. Reduction of costs, of the time required to engage / execute the necessary activities

Valori aggiunti della ns struttura:

Multidisciplinarietà ed armonizzazione delle competenze con unica interfaccia operativa

Contrazione dei costi, dei tempi di ingaggio/esecuzione delle attività necessarie

Different types of DD:

- **Execution of DD before the acquisition** of the Best Order awareness of the scenarios on which it will impact during ordinary management Projection of the costs and income of the facility that can be generated by the acquisition
- **Execution of DD during the Contract Precise** management of risk profiles, opportunities to generate business through targeted actions, search for efficiency of systems
- **Execution of DD at the conclusion** of the Order Release of the site with management simplifications, division of responsibilities

The DDs we provide:

- Structural
- Plant engineering
- Health and safety in the workplace
- Construction - urban planning
- Geological
- Energy
- Fire prevention

Benefits deriving from executions of Technical Due Diligence:

- Elimination of the criticality profiles that emerged
- Management of shared and uniquely codified data archive
- Punctuality of documentary adaptation
- Better allocation of resources for property management
- Drafting of asset maintenance plans
- Activation of the policy of heritage enhancement

TRAINING

TRAINING

We are able to develop **customized training plans**, which can be **financed through** the **main inter-professional funds**.

The courses we **offer** can be **given in the company, in the classroom**, by **videoconference** or in **asynchronous e-learning** mode thanks to our platform.

We also offer inter-company courses suitable for micro or small businesses or for large companies that need to train a small number of employees.

OUR COURSES:

- Compulsory corporate training on safety in the workplace
- Professionalizing and managerial corporate training
- Training accredited by the Lombardy Region
- E-learning training
- Training in soft skills and transversal skills thanks to the partner company CEO srl

We have a training room fully equipped accredited by the Lombardy Region. It is possible to rent our space and we are available to organize the secretarial and catering service for your training course.

ENERGY

ENERGY

We have the **necessary skills** for the **implementation** of the **energy system** of a company or private through a path of analysis, preparation of documentation and procedures, definition of monitoring and design parameters.

We carry out **energy audits for buildings** in the **public and private** sector, in industrial processes and in transport. We offer a 360 ° **service** in **consulting** and **designing** the **building-plant system**: our technicians design the building envelope, the electrical and thermal systems, proposing cutting-edge solutions to achieve the energy performance required by the regulations on energy containment.

OUR SERVICES:

- Preliminary, definitive and executive design
- Drafting of technical reports, specifications, technical specifications, metric calculations
- Works management
- Standardization of existing plants
- Verification of the state of affairs of plants and structures
- Technical-economic feasibility studies
- Consultancy on energy containment
- Energy Performance Certificates (APE)
- Design of accounting systems
- Design and maintenance of photovoltaic systems
- Assessment of electrical risk for atmospheric discharges
- Periodic checks of electrical systems

We have in our staff Energy Management Experts (EGE) certified according to UNI CEI 11339, with the technical skills and experience to perform energy audits

We offer the skills for the implementation of the Energy Management System in your organization through the analysis, preparation of documentation and procedures, definition of monitoring parameters and periodic auditing activities for obtaining the UNI CEI EN ISO 50001 certification.

The certification of the Energy Management System according to the UNI CEI EN ISO 50001 standard is a valid tool to control and significantly reduce energy consumption for all organizations, large and small, in the public and private sector, in industry and in services.

REGULATORY
COMPLIANCE

REGULATORY COMPLIANCE

Our consultants offer an adjustment service to the regulations in force regarding the **processing of personal data**, in compliance with European legislation (**EU Regulation 2016/679 or GDPR**). The advice and assistance we provide is aimed at all companies, both in the public and private sectors and for all types of treatment.

The objective of the GDPR is to protect individuals with regard to the processing of personal data: to this end, our consultants support companies so that the processing carried out complies with the standard.

Personal data may be present in every company and it is therefore important to treat it correctly for the benefit of the data subjects and the company itself, the data controller; the data processing carried out within the companies may cause damage to the interested parties; the danger for the company is a very heavy sanction.

Among the activities included in our consultancy:

- Support of the company to provide solutions for the fulfillment of the obligations required by the GDPR
- Provide operational indications to manage the information system in the company, to verify the technical and organizational methods and that security measures are adopted
- Provide the Data Protection Officer (DPO) service able to support the Data Controller according to the indications of the GDPR
- Guarantee the necessary support to implement the register of activities

Furthermore, our consultants offer an adjustment service to the regulations in force on administrative liability for the crimes by **Legislative Decree 231/2001**. The advice and assistance we provide is aimed at all business entities, both in the public and private sectors, of every activity and organizational structure.

Our goal is to allow the company to exempt itself from administrative responsibility for the crimes provided by Legislative Decree 231/2001 and to avoid very heavy penalties for the company in the event of the commission of offenses / crimes, for this purpose we are available to every reality to:

- Provide solutions for the fulfillment of the obligations provided for by Legislative Decree 231/2001 and subsequent amendments
- Implement, update and maintain over time an Organizational, management and control model (theso-called Model 231) useful in the prevention of risk-offenses which constitutes the only exemption from liability of the company
- Cover the position of Supervisory Body (ODV), both in single-person and collegiate composition, necessary for the effectiveness of the 231 Model

INTEGRATED MANAGEMENT
SYSTEMS

INTEGRATED MANAGEMENT SYSTEMS

Integrated management systems have now assumed a crucial role in the organization of many companies.

We accompany the company **throughout the analysis**, creation of **documentation**, implementation of SGIs based on different standards.

OBJECTIVES OF OUR CONSULTING:

- Realize, maintain and continually improve performance in terms of health and safety, environment, energy and quality
- Maintain and ensure legislative compliance
- Streamlined management of information and reduction of related costs
- Management of prevention instead of emergency
- Allowing company to exempt itself from administrative liability for the offenses envisaged by Legislative Decree 231/2001
- Possibility of entering foreign markets with an objective guarantee of the organization's quality
- Improving the corporate reputation and consequently acquiring greater competitiveness

Struqtore accompanies the Client Company throughout the analysis, documentation, creation and implementation of SGIs based on two or more standards, integrating existing systems.

Our consulting regards:

- ISO 9001
- ISO 14001
- ISO 50001
- ISO 45001

ENVIROMENTAL CONSULTING

ENVIROMENTAL CONSULTING

We perform company **audits to assess** the existing situation and **define** the necessary interventions **to bring the company into compliance**, taking into account the reference legislative framework, in order to minimize the risks and environmental impacts associated with the business.

We are able to provide for the fulfillment of the environmental obligations defined by Legislative Decree 152/06 on issues related to waste, atmospheric emissions, water discharges and noise.

OUR SERVICES:

- MUD preparation
- Waste management
- Control of emissions into the atmosphere
- Environmental audits and certifications (UNI EN ISO 14001)
- Environmental noise, acoustic impact assessment
- AUA practices (Single Environmental Authorization)
- Drafting of Solvent Management Plan and Mass Balance
- Registration National Register of Environmental Managers

TOOL IN CLOUD

ACTION PLAN

Action Plan® is a **technological tool** at the service of **safety** and **work management** that allows to manage all the **technical deadlines** that are recorded in relation to lifting systems, pressure equipment, thermal, electrical, and fire-fighting systems, production machinery, PPE and tools of measurement.

ADVANTAGES

- Management of deadlines directly on the field via QR code
- Notifications via e-mail in proximity of deadlines
- Detailed reports on interventions
- Multimedia management of contents (photos, videos, user and maintenance manuals)
- Management of intervention requests for extraordinary maintenance
- Cost reduction and waste
- Regulatory compliance

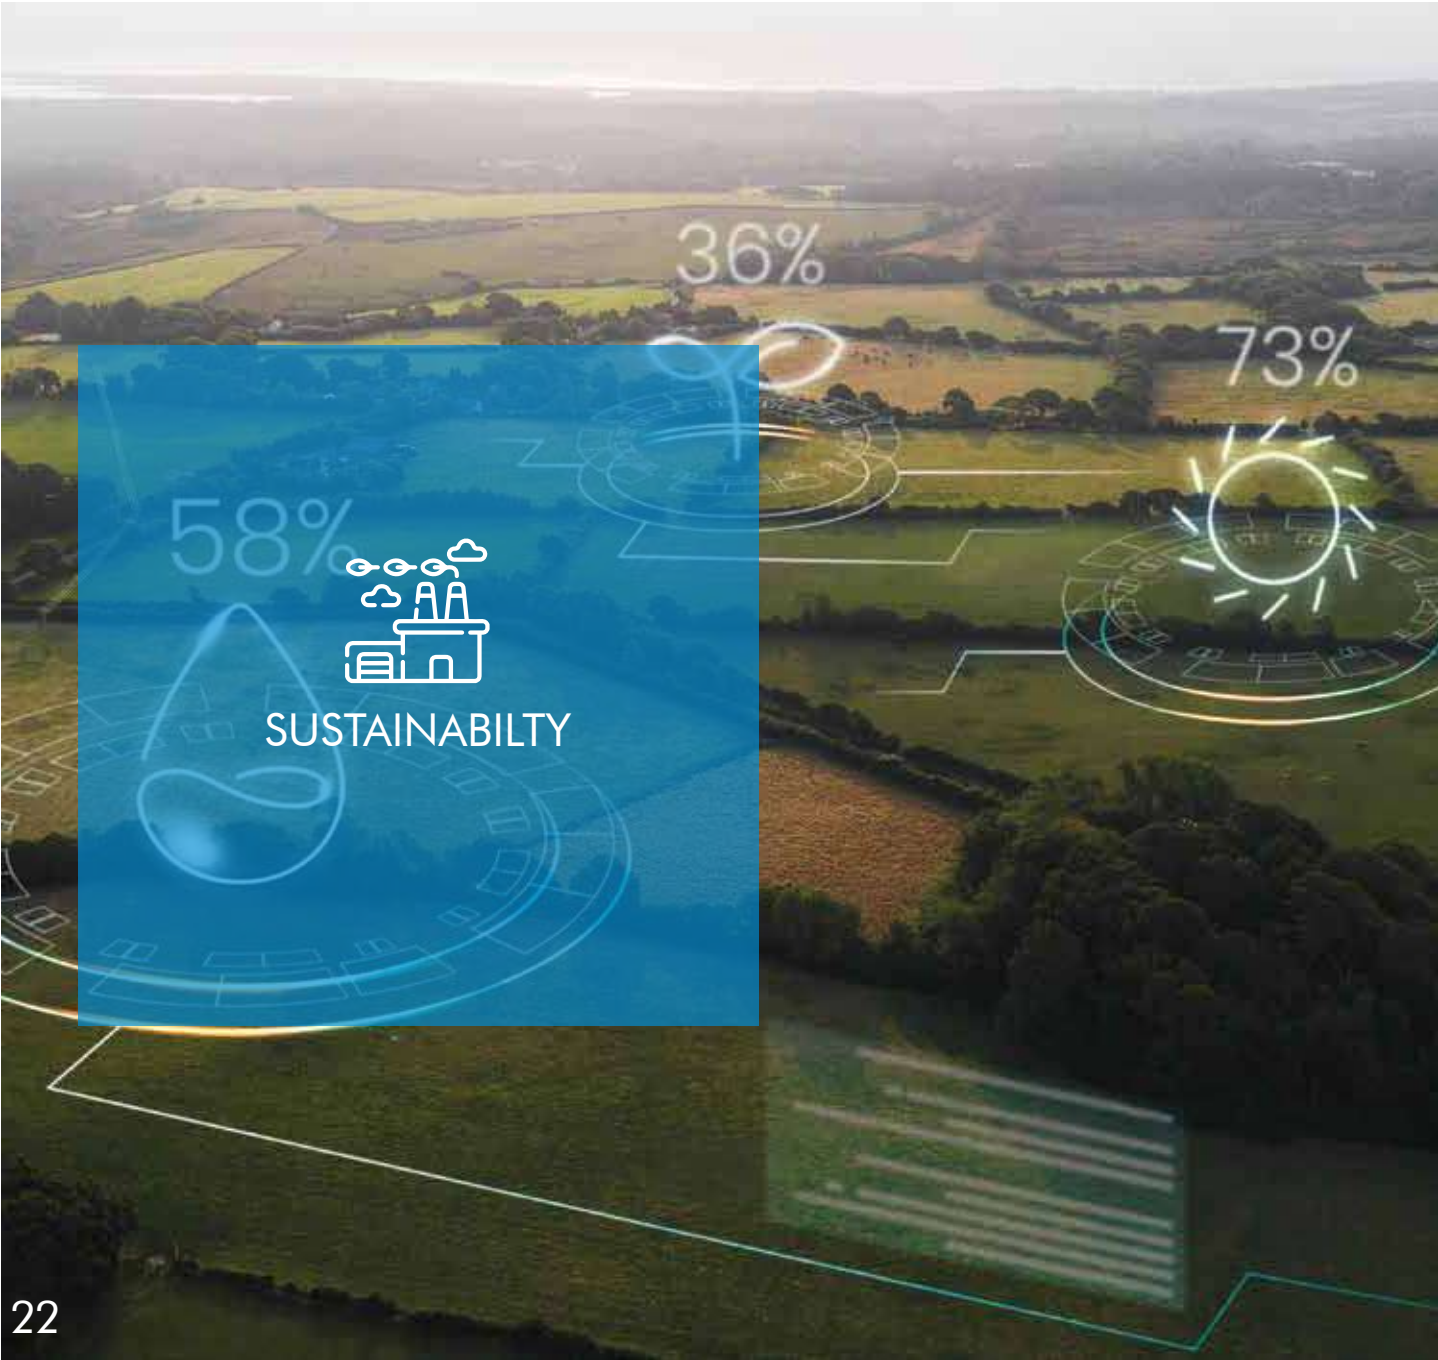

Cruscotto training

CRUSCOTTO is an online tool for managing mandatory training on company employee safety. Through a **Reserved Area** it is possible to monitor the training status of the company's workforce, view and download certificates and manage deadlines.,

ADVANTAGES

- Constant compliance with regulatory compliance
- Ease of preparation and planning of training
- Speed of response in case of ASL checks

SUSTAINABILITY

Man is not an environmentally sustainable species and in his actions he does not care about the environmental consequences or respect the nature and other living species. Therefore, new strategies become necessary that shift people's attention from themselves to the environment, in order to increase our eco-sustainability.

To this end, production chains have begun to adopt more **sustainable environmental policies**.

The use of **renewable energy** sources and the efficient use of resources has increased, the **circular economy, recycling and reuse** practices have been encouraged, and **sustainable mobility** has been promoted.

To measure the effectiveness of the actions implemented, environmental sustainability indices are used which can be descriptive (e.g. CO2 emissions), performance (e.g. the percentage of separate waste collection carried out on the total), efficiency (e.g. the reduction of atmospheric emissions in relation to the economic resources used to achieve it) and total well-being.

Our consultants are able to assist companies in defining these indicators also through the analysis of the life cycle of their products (**LCA - Life Cycle Assessment**) and the environmental product declaration (**EPD - Environmental Product Declaration**) in order to define its impact on the environment.

Questi sono strumenti sia di analisi che di comunicazione e sono utili per:

- Differenziare i propri prodotti/servizi comunicandone informazioni dettagliate sull'**impatto ambientale**
- Dimostrare che i **prodotti soddisfano i requisiti ambientali** contenuti nelle politiche ambientali di **approvvigionamento (Green Procurement)** dei grandi gruppi di acquisto (es. Pubblica Amministrazione, Grande Distribuzione, ecc.);
- Implementare un sistema di **miglioramento continuo della qualità ambientale dei prodotti**.

These are both analytical and communication tools and are useful to:

- Differentiate products / services by communicating detailed information on their environmental impact
- Demonstrate that the products meet the environmental requirements contained in the environmental procurement policies (Green Procurement) of large purchasing groups (e.g. Public Administration, Large Distribution, etc.);
- Implement a system of continuous improvement of the environmental quality of products.

CALLS SECTION

CALLS SECTION

We guide our customers towards the most suitable incentive **mechanism for their development project**, in any area of intervention.

OUR SERVICES:

- Define and evaluate the most appropriate form of incentive
- Instruct the plan and procedures for obtaining funding
- Take care of every aspect of the process until the grant is obtained
